during the NGI session
@ Net Futures 2017

Statement 1:

Tools such as codes of conduct, standards, and certification have a role to play for the protection of the connected individual.

Mentimeter

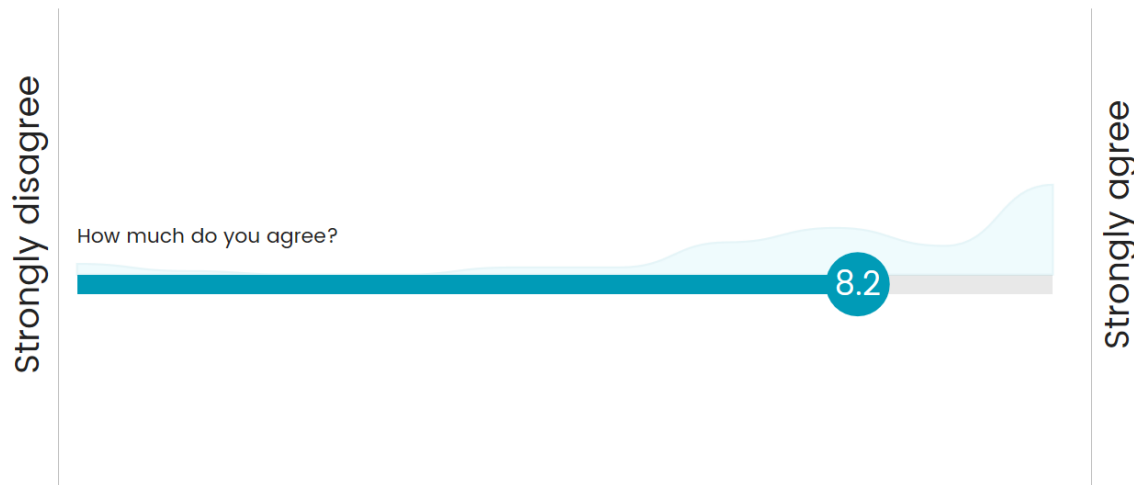

72

Statement 2:

To reap the benefits of the digital revolution, the EU must ensure that its public policies will not undermine innovation by creating data silos.

 Mentimeter

 64

Statement 3:

National security cannot overrule real cybersecurity in the Internet of the future.

Mentimeter

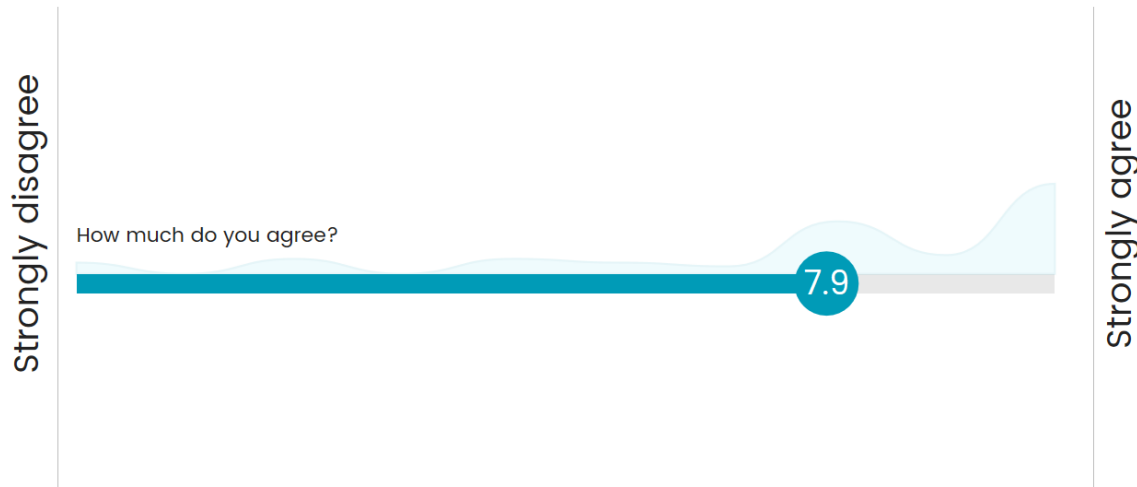

61

Statement 4:

A better Internet means an Internet where computer scientists, sociologists, and lawyers work together to ensure privacy and security of the users.

 Mentimeter

 60

Statement 5:

Access to more funding would help young entrepreneurs to build businesses driven by ethics and less by profit.
